

JOURNAL

OFFICE OF LEGISLATIVE COUNSEL

Tuesday - 26 January 1968

1. [] and John Warner met with Ken De Lien, Ed Weisl, Cy Vance and Max Lehrer to discuss details pertaining to the hearing scheduled for 29 January before Senate Aeronautical and Space Sciences Committee and Senate Preparedness Investigating Subcommittee. For full details see Memorandum for the Record.

2. George Murphy telephoned to inquire if there were any new estimates that might be made available to the Joint Committee on Atomic Energy. I indicated that they had all of the current estimates in the nuclear field. He mentioned estimates in the missile field and I advised him that the receipt by the Joint Committee of nuclear estimates was a special arrangement and that other estimates were not customarily made available by the Agency and, consequently, we would not offer any of these to the Committee. He inquired what would happen if the Committee formally requested these and I stated that we would have no objection to receiving the request but that he might wish to consider whether this was a wise thing to do since probably we would not be in a position to make them available. He indicated he was going to drop the matter.

3. Arrangements were made to deliver copies of the Director's speech to a number of Senators and Representatives the first thing in the morning of the 27th. Attached is a list of the recipients.

25 YEAR RE-REVIEW
